

ELECTRON Ca

IONIC FORM

For supplying plants with calcium.

FOR AMATEUR USE

SOIL IMPROVER

QUARANTEDD COMPOSITION:

- Calcium (Ca): 550 ppm
- Nitrogen (N): 450 ppm

DESCRIPTION: ELECTRON Ca is an innovative foliar Calcium-Nitrogen formulation in ionic form. Due to its innovative technology, it is absorbed instantly and efficiently by the plant's foliage. ELECTRON Ca is used for the supply of valuable calcium to plants. Calcium builds the outer walls of cells so that the plants are healthy, with a beautiful appearance and strong to withstand adverse weather conditions and enemies. It is necessary for good plant health and their defense in biotic and abiotic agents.

METHOD AND TIME OF APPLICATION: ELECTRON Ca is applied to all your plants, Apple, Pear, Stone fruits (Peach, Cherry, Plum, Cherry etc.), Acorns (Almond, Pistachio etc.), Citrus, Olive, Vine, Vegetables-Horticultural, Floral- Ornamental.

It is applied by universal and uniform foliar spraying until run-off throughout the year. Repeated applications may be required.

PRECAUTIONS: - Away from children. - Wash hands thoroughly after handling. - Avoid release into the environment.

Poison Centre Telephone: 1401

STORAGE CONDITIONS:

Store in its packaging, at a temperature above 0°C, in an enclosed store, protected from extreme temperatures, fire and moisture.
